Professional Summary

Senior Analyst - AI Augmented Analytics with 3+ years of experience building **AI-powered automation platforms**, **agentic systems**, and **enterprise data platforms**. Currently delivering **Microsoft Fabric** lakehouse pipelines, **data quality frameworks**, and **Azure AI Foundry** agents at ContinuServe. Previously designed and shipped production-grade AI applications using **LLM orchestration**, **RAG pipelines**, **multi-agent frameworks**, and the **Model Context Protocol (MCP)** on top of Anthropic Claude, OpenAI GPT, and Google Gemini. Hands-on with **PySpark**, **Delta Lake**, **Snowflake**, **Apache Airflow**, **DBT**, and **Workato** for data engineering, and with **TypeScript**, **Python**, **Node.js**, and **React** for full-stack delivery. Proven ability to take ambiguous business problems, architect end-to-end AI solutions, and deploy them for enterprise clients.

Skills

AI & LLM Engineering: Anthropic Claude (Sonnet/Opus/Haiku), Azure OpenAI, OpenAI GPT-4o/o1, Google Gemini, Prompt Engineering, RAG, Multi-Agent Orchestration, Model Context Protocol (MCP), Agentic Pipelines, Tool-Use / Function Calling, Vision AI, Test Simulation, LLM Cost Optimization
AI Frameworks & SDKs: Azure AI Foundry (Agents), Microsoft Fabric Data Agent, Claude Agent SDK, Anthropic TypeScript/Python SDK, OpenAI SDK, ElevenLabs (STT/TTS), Ink (terminal UI), Vercel AI SDK
Programming Languages: Python, PySpark, TypeScript, Node.js, SQL, Ruby, React, Next.js
Data & Cloud: Microsoft Fabric (Lakehouse, Notebooks, Pipelines), Delta Lake, Azure SQL Database, Azure Key Vault, Snowflake, AWS (S3, Glue, Lambda, ECS, IAM, Secrets Manager), Apache Iceberg, Redshift, MongoDB, MySQL
Integration & Automation: Workato, REST APIs, Webhooks, SFTP, SuccessFactors, Salesforce, PrismHR, NetSuite, HubSpot, Replicon
Orchestration & DevOps: Apache Airflow, Dagster, DBT, Matillion, Terraform, Docker, GitHub Actions
Tools: Git, Postman, FastAPI, Express, WebSocket, Vitest, Pytest

Certifications

Professional Certifications: Workato Technical Architect | Workato Technical Developer | Workato Automation Pro I, II, III | Enterprise Automation Certification | Blue Prism Certified | AWS Cloud Essentials | Reltio Platform Data Flow

Anthropic AI Training (16 courses, April 2026): Building with Claude API | Introduction to MCP & Advanced Topics | Claude Code 101 & in Action | Agent Skills | Subagents | Claude with Amazon Bedrock & Vertex AI | AI Fluency Framework

Experience

Senior Analyst May 2026 – Present
ContinuServe *Pune, Maharashtra, India*

- Built a **Replicon Analytics API** extractor as a **Microsoft Fabric notebook** covering the full async extract lifecycle, loading data in-memory straight to **Delta tables** in a Bronze Lakehouse (no intermediate CSVs), with Variable Library configuration and row-level audit timestamps.
- Own a universal **Data Quality framework** (nightly Python engine): added **Azure Key Vault** integration, config-driven query validation persisted to SQL audit logs, and daily snapshots with day-over-day comparison for anomaly detection.
- Architected an agentic layer of two **Azure AI Foundry agents** (Rule Author and DQ Analyst) over the DQ engine, exposing a purpose-built **DQ Tool API** in place of direct SQL MCP access for tighter governance.
- Building a Silver-layer **guest identity resolution** and invoice deduplication pipeline in **Azure SQL Database** using phonetic name matching (Caverphone 2.0) and a guest crosswalk pattern across a multi-center business.
- Prepared the technical assessment of a **Microsoft Fabric Revenue Pipeline** (NetSuite, HubSpot, SharePoint sources across two workspaces) ahead of a formal BAU takeover.
- Supporting a client **Fabric Data Agent** POC and demo alongside the team's Azure AI Foundry and ML-based QC reporting solutions.

Consultant - AI Augmented Analytics June 2023 – May 2026
DynPro India Pvt Ltd *Pune, Maharashtra, India*

- Lead AI engineer on **ODM Assist** (DaVita): multi-model RAG pipeline that generates complete IBM ODM rule projects from Visio diagrams and plain English, eliminating the developer handoff.
- Delivered **Ativad AI** client POC: voice-driven clinical rules platform converting spoken requirements into executable BAL rules with tests.
- Spearheaded DynPro's internal AI R&D: built **MrBean AI** and the **Agentic SDLC Engine**, adopted for org-wide R&D.
- Designed **Apache Airflow DAGs** orchestrating IBMi (AS/400) journal-based CDC → AWS S3 → Apache Iceberg → Snowflake via DBT (MTS); reduced data processing time by **40%** via parallel execution and optimized scheduling.
- Built **Workato** recipes for IBMi CDC extraction and executed SuccessFactors API integrations, SFTP exchanges, and Redshift migrations with 10+ downstream applications for Lucid Motors HRIS.
- Authored **Terraform** IaC for Dev/Prod provisioning (IAM, EC2, VPC, S3, Secrets Manager); integrated Microsoft Teams real-time alerting via Airflow.
- Automated end-to-end eligibility detection and employee auto-enrollment for PSH Healthcare (Hawaii Pre-Paid Health Care Act compliance) with a React/Node.js pipeline UI.

AI & Agentic Projects

ODM Assist | *Claude, GPT, Gemini, TypeScript, Node.js, RAG, Vision AI* *Client: DaVita*

- AI-powered IBM ODM 8.12.0 project generator with **7-step agentic pipeline**: Visio/Excel/text input → structured extraction → test generation → Excel report → full ODM project → JUnit harness → LLM-based test simulation → self-verification.
- Multi-modal input: **vision AI** for PNG/JPG diagrams, **deterministic XML parsing** for .vsdx files (60+ Visio master types, swim-lane detection), and Excel rule table imports.
- Interactive SME review loop eliminates the developer handoff - business experts author rules directly, AI generates the full ODM project (BOM, XOM, BRL/DTA, ruleflow, metadata).

Ativad AI Demo | *Next.js 14, TypeScript, Anthropic SDK, ElevenLabs STT/TTS* *Client POC*

- Voice-to-Rule pipeline for hemodialysis operations - spoken clinical requirements are transformed into executable **BAL (Business Automation Language)** rules with auto-generated triggered / not-triggered / edge-case test suites.

MrBean AI | *TypeScript, Ink, Express, Anthropic/OpenAI/Gemini SDKs, MCP* *Internal R&D - DynPro*

- Self-hosted, multi-provider agentic framework: **CLI**, **REST + SSE + WebSocket API**, and **programmatic SDK** with one config change between Anthropic, OpenAI, Gemini, Groq, OpenRouter, and local Ollama.
- **39 tools** across file ops, shell, search, MCP, tasks, sub-agents, and web; **48 bundled SDLC agent templates** with autonomy tiers (T1 autonomous / T2 supervised / T3 human-gated).
- Real multi-agent execution (depth 3, per-child cost rollup), **persistent memory** with 30-day TTL and auto-promotion to permanent, session resume, and per-session + daily cost budgets; **396 tests** (Vitest) and Docker Compose deployment.

Agentic SDLC Engine | *Python, Claude Agent SDK, FastAPI, Next.js 15, PostgreSQL, AWS ECS* *Internal R&D - DynPro*

- Production-grade platform of **48 specialized AI agents across 8 SDLC phases** - Govern, Discover, Design, Build, Test, Deploy, Operate, Oversight - that automates code review, test generation, security scanning, deployment checks, and incident triage.
- Each agent is declaratively configured via YAML manifest with hard **cost budgets** ($0.004-$0.092 per invocation), token limits, PII scanning, schema enforcement, and full audit trail.
- Governance layer (G1-G4) with fleet-wide circuit breaker that trips at 25% of daily budget per hour; oversight layer (OV-1 to OV-12) for quality, PII, drift, and contract validation.

Education

AMC Engineering College Bangalore, India

Bachelor of Engineering in Computer Science and Engineering *2018 – 2022*

Achievements

Spot Awards (DynPro) for managing concurrent projects and pioneering AI automation; **client recognition** from PSH Healthcare and DaVita for ownership and ahead-of-schedule delivery.
